

Welcome to **Weso**

Pitch Deck

B2B Infrastructure Platform & **B2B2C** Experience Layer **Insurtech**

The Ai Operation Layer for insurance services.

The Problem We Solve!

The Insurance Operations Layer Is Broken

The traditional insurance assistance model is fragmented, expensive, and heavily dependent on manual coordination.

Weso replaces call centers, intermediaries, and legacy operators with a real-time coordination infrastructure that reduces costs, improves execution, and transforms assistance into a scalable fee-for-service model.

What's Broken in Today's Market

Behind every insurance policy exists a fragmented operational infrastructure built decades before real-time automation.

01.

Broken financial incentives

The system makes more money when it spends less on customer service.

02.

Reliance on intermediaries

There are too many operational layers between the insurer and the actual solution.

03.

Loss of customer control

Insurance companies outsource their customer experience to external third parties.

04.

Outdated infrastructure

The current model still relies on manual processes and structures designed before the AI era.

Our Solution, Reimagined

Request → Ai Intake → Match → Dispatch → Follow Up → Resolutions → Data back

One Ai Operations Layer

Weso consolidates TPAs, assistance companies, dispatch operations, and call centers into a single AI-powered coordination platform.

AI-Native, Real-Time Operations

We automate service orchestration end-to-end with AI, reducing operational friction, response times, and fixed costs.

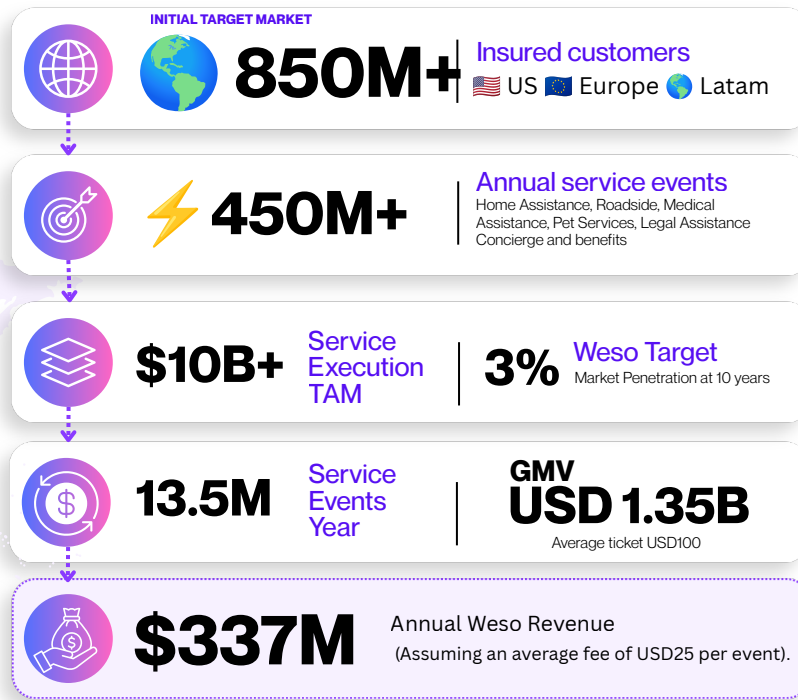

Usage based Economics

Unlike legacy per-capita models, Weso operates with a flexible pay-per-use structure enabled by automation and intelligent coordination.

Market Global Opportunity

A Global Operational Layer Behind Insurance

Legacy Stack → Weso Infrastructure

Changing the Economics

Why does Weso win now?

From paying for insured members to paying only for services used.

FROM

Pay for Every Insured Member

TO

Pay Only for Services Used

We structurally changed the economics.

One Platform

AI-Driven Operations

Usage-Based Economics

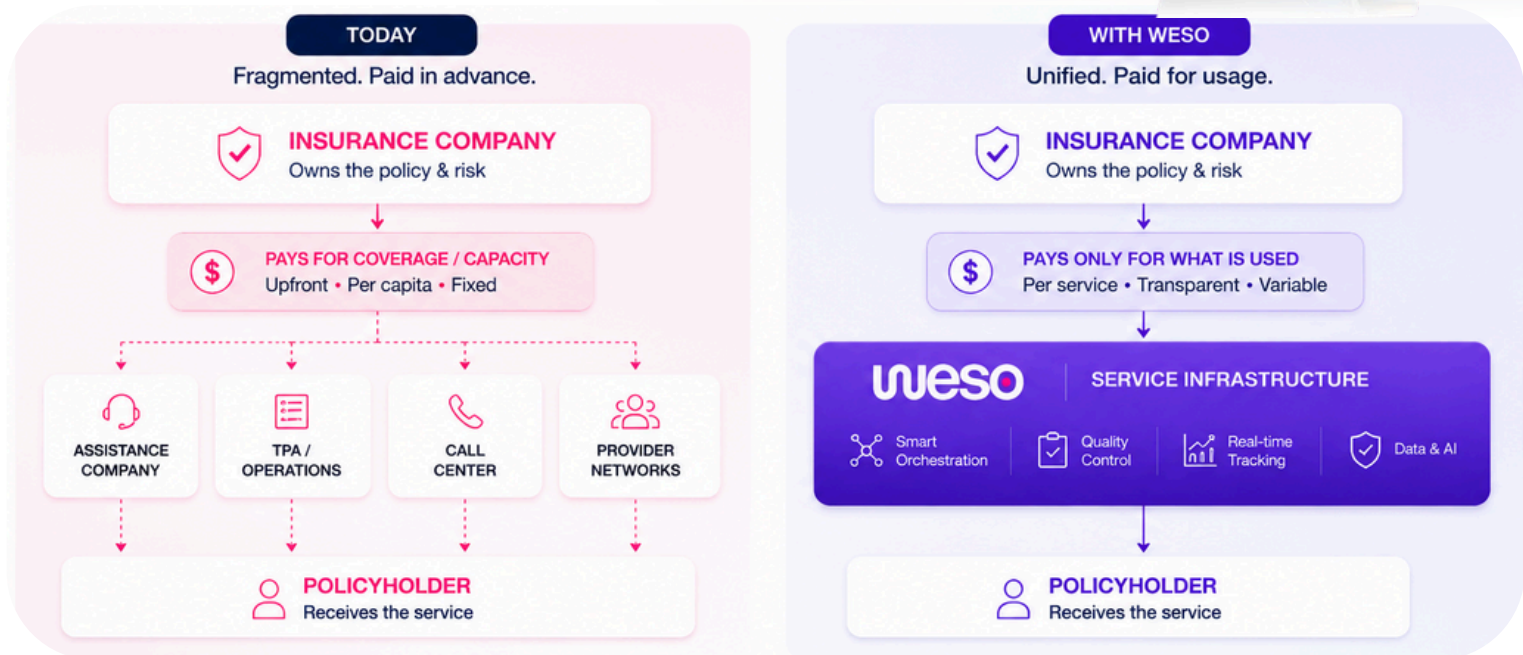

45% savings for insurance companies

35% Fee for service Weso, per service.

Why Weso gets stronger with scale.

Every Service improves the infrastructure behind the next one.
