

WESO | DATA ROOM AND AGENT REVIEW

Make the operating story financeable and testable.

Planning basis: the user accepts the latest WESO information as valid input for this process. Forecast targets remain forecast inputs. **Next step:** reconcile the financial definitions and governing investment terms, then evaluate one service-event workflow with a named business owner. WESO offers a concrete operating use case for Ironman OS: connect service requests, provider performance, invoices and collections to a source-linked review pack.

WESO describes AI-assisted insurance and assistance coordination with human escalation, intake, matching, dispatch, follow-up and resolution. This operating-services role supports portfolio monitoring; it does not establish a token issuer, bank, payment or securities-intermediary authorization for WESO or Ironman.

Latest management round summary — source S1

Term / metric	Management statement	Review treatment
Raise / structure	US\$300,000 SAFE; US\$6M cap; US\$30,000 minimum	Discount rate, pre/post-money basis and conversion terms need one governing version.
Stage	Seed / Pre-Series A	Other pitch material says Pre-Seed. Reconcile dated positioning.
Scale ambition	200 events/month today → 105,000+ at 18-24 months	At least 525× growth, calculated from stated endpoints; not achieved.
ARR ambition	US\$125,000 today → US\$9.2M+	73.6× target/current ratio; recurring and usage definitions need reconciliation.
Use of funds	40% technology; 25% integrations; 20% network; 15% US/legal	On US\$300k: US\$120k / 75k / 60k / 45k. Allocation is not a cash runway model.

Four items before a decision-quality investment pack

Revenue: reconcile gross services, WESO fees, licenses and ARR. **Capital:** separate cash received from option/grant values. **Terms:** reconcile SAFE, ownership and corporate records. **Execution:** verify customer go-lives, source-code rights and authenticated event access.

Internal management review, 7 September 2026. Source statements, calculated comparisons and proposed tasks are identified separately. This review does not constitute an accounting audit or legal opinion. No live agent, customer outreach, transaction or production integration was run.

FINANCIAL DILIGENCE | W01, W06-W09, W11

One vocabulary for revenue, margin and growth.

Finding	Source / calculation	Action and closure evidence
W01 · Revenue bridge	S1: US\$9.2M+ ARR target. S6 month 24: US\$9,419,101 monthly gross service revenue; summed WESO fees + licenses US\$2,125,602/month.	Accountant-approved gross/net and recurring/usage policy; invoice, ledger and bank tie-out. Annualizing fees gives US\$25,507,224, a modeled run-rate, not contracted ARR.
W08 · Margin labels	S6 P&L Z54 gross margin 22.02%, versus S1 32% target: 9.98 percentage-point gap. Row 147 shows 54.29% EBITDA/gross profit; EBITDA/gross revenue is 11.96%.	Correct denominator labels and reconcile target to modeled delivery costs. Preserve an audit trail of changes.
W08 · License roll-up	Month 24 P&L license revenue US\$20,000 versus US\$24,000 summed from actor schedules.	Reconcile the US\$4,000 monthly difference to contract scope and formula logic.
W06 / W07 · Growth basis	S6 months 1-6 show zero events; month 7 has 150. S1 says 200/month today. Customer stages vary across documents.	Map calendar months and actual/forecast cutover; distinguish prospect, signed, implementing, live and paid. Carrier names in forecasts are scenario labels.
W09 · Delivery cost	Model assumes US\$0.205/minute × 7 minutes × 1.5 calls = US\$2.1525/event for AI calls; 20% human handling.	Validate call usage, escalation, rework, staffing coverage and vendor rates using real cohorts and invoices.
W11 · Funding capacity	Use-of-funds percentages supplied; no complete cash/working-capital bridge identified.	Build opening cash, collections, supplier payments, hiring and integration milestones before claiming runway.

Model-review scope: S6 contains 36 worksheets, 72 monthly periods and 8,291 formula cells. Stored formula values contained no spreadsheet error values in the scan. The 32 actor schedules and key summaries are hardcoded forecasts. This was a structural and representative formula/cached-value review; the workbook was not recalculated.

Sources: S1 investment round summary; S3/S7 pitch materials; S6 P&L Z7, Z45, Z54, rows 146-147; actor schedule Y15 fee/license totals. Monetary comparisons follow source dollar figures; confirm the reporting currency in the reconciled model.

LEGAL, CAPITAL AND PRODUCT | W02-W05, W10

Reconcile enforceable rights and demonstrable capability.

Finding	Observed discrepancy	Required evidence / proposed owner
W02 · Capital raised	S2 headline US\$917,840 includes US\$685,840 in stock-option-class rows (74.72%). Other founder/SAFE/warrant rows total US\$232,000.	Finance: bank receipts, general ledger, grants/exercises and funding schedule. Neither total is bank-verified cash raised.
W03 · SAFE / ownership	S1: SAFE with US\$6M cap; discount unspecified. S3: US\$300k and “5% stock.”	Structuring + counsel: one final instrument, cap basis, conversion waterfall and fully diluted treatment. 300k/6M is arithmetic, not assured ownership.
W04 · Corporate records	S5 and S2 differ on founder contribution (US\$89,600 / 89,000), a 6% holder’s category, date language and preferred-rights authorization.	Legal / closing: executed amendments, consents, membership ledger and issuance authority. Original signature pages were not visually reviewed; no unsigned-document conclusion is made.
W05 · Warrants	A 0.43% allocation, US\$13,000 and US\$3M valuation reference appear in records; no standalone executed warrant in the seven-file inventory.	Closing: actual instrument, holder, strike, expiry, vesting, authority and exercise history. Email references to ICP warrant milestones are separate claims.
W10 · Claims / access	Materials cite 40% or 45% savings; pitch fee 35%, model fees 20–30%; “no risk” wording appears in S4.	Commercial / technology: reconcile pricing and measured savings; remove absolute claims from approved marketing. Obtain APIs, sandbox evidence, service liabilities and code/data rights.

Proposed WESO event contract for Ironman

Use a stable service/case ID to link intake → eligibility review → provider assignment → completion evidence → invoice → payment/return → reconciliation. Require tenant scope, source event ID, timestamps, signature verification and replay handling. Failed service, duplicate events and mismatched cash remain explicit exceptions.

The current local WESO validator accepts caller-supplied traces and holds them as unverified. It does not authenticate or persist vendor events. A sandbox test should prove both a valid evidence chain and failures for forged callbacks, duplicate IDs, cross-tenant access and returned payments.

Sources S2, S3, S4, S5 and S6; uploaded email excerpts are management statements. This is a request list for qualified legal, accounting and engineering review, not completed sign-off.

AGENT TASKS | 1-9 OF 18

Every task needs evidence and an accountable reviewer.

Proposed allocation to the existing Ironman platform roles. No plans, permissions, triggers or activation states were changed. Agent names identify work queues; responsible humans must approve conclusions.

Platform role / priority	Proposed WESO task	Evidence → output
ICP Value Creation P1	Propose one measurable claims/dispatch improvement; baseline cost and outcome before ROI.	Baseline events, service cost, reviewer effort Output: Pilot scorecard and stop rule
ICP Risk Early Warning P1	Track carrier concentration, cash timing, unresolved legal/model exceptions.	Contracts, monthly cohorts, issue ledger Output: Evidence-linked risk exceptions
ICP Portfolio Monitor P1	Track actual vs forecast events, revenue and margin after definition bridge.	Invoices, event ledger, accountant-approved metric definitions Output: Monthly reconciled portfolio pack
ICP SPV & Closing Prep P0	Reconcile SAFE, ownership and warrant documents before closing pack.	Signed instruments and member/board approvals Output: Closing checklist with unresolved items
ICP Investor Relations Intelligence P1	Prepare a consistent factual update; no unapproved forwarding or claims.	Approved round, source-linked metrics and disclosures Output: Dated investor draft
ICP Structuring P0	Resolve SAFE cap basis, discount, conversion and jurisdiction route with counsel.	Final SAFE, cap table, counsel memo Output: Instrument and dilution bridge
ICP Investment Committee Prep P0	Assemble recommendation and contrary evidence; preserve open findings.	Finance, legal, commercial and tech workpapers Output: IC evidence pack and decision log
ICP Valuation P0	Reconcile revenue/ARR, gross/net economics and dilution before valuing.	72-month model, bank/ledger evidence, signed SAFE Output: Scenario model with definition bridge
ICP Deal Flow Analyst P1	Define insurer/assistance buyer and qualify pipeline by signed/live/paid stage.	Dated CRM and contracts Output: Qualified buyer and pilot shortlist

AGENT TASKS | 10-18 OF 18

Every task needs evidence and an accountable reviewer.

Proposed allocation to the existing Ironman platform roles. No plans, permissions, triggers or activation states were changed. Agent names identify work queues; responsible humans must approve conclusions.

Platform role / priority	Proposed WESO task	Evidence → output
ICP Technology Due Diligence P0	Verify API, event signatures, tenant isolation, provider rights and code ownership.	Architecture, API spec, sandbox and IP assignments Output: Integration acceptance and risk register
ICP Commercial Due Diligence P0	Validate 200-event baseline, pricing/fee differences and 40/45% savings claims.	Cohorts, invoices, service logs and comparison method Output: Evidence-backed commercial claims
ICP Due Diligence Lead P0	Own seven-file source index, discrepancies, owners and closure evidence.	Authorized data room and review outputs Output: One dated diligence status
ICP KYC Intelligence Officer P0	Prepare identity/UBO evidence for authorized counterparties; resolve homonyms.	Lawfully provided entity/identity documents; approved screening Output: Draft KYC evidence pack; hold until reviewer
Ironman Audit Sentinel P0	Check metric citations, unresolved issues and exact output versions.	Source hashes, review comments, acceptance results Output: Independent exception report
Ironman Legal Risk Governance P0	Resolve counsel gate, ownership terms, issuer/intermediary roles and claims.	Signed corporate/SAFE/warrant documents; relevant legal memo Output: Counsel issue register; sign-off pending
Ironman Capital Formation P0	Prepare compliant round materials and fee route; no investor solicitation action here.	Approved SAFE, fact sheet, distribution/compensation scope Output: Ready-for-review fundraising pack
Ironman Chief of Growth P1	Design one paid-pilot proposition supported by verified use-case economics.	Buyer evidence, pricing, integration scope Output: Pilot offer and measurement plan
Ironman Relationship Operations P1	Index WESO follow-up points and draft requests; send only if authorized.	Diligence backlog and verified recipients Output: Follow-up drafts and meeting agenda

EVIDENCE INDEX | SEVEN SOURCE FILES

Close the gaps in order.

ID	File in the supplied WESO folder	Review scope
S1	WESO - Investment One-Pager (The Round)-2.pdf	Full extracted text; management round terms.
S2	CapTable-WESO-2026-07-22.pdf	Full-page visual review; generated cap report.
S3	One Paper Pitch Weso-3.pdf	Full extracted text; company pitch claims.
S4	Insurtech Service By Weso [ES].pdf	Full extracted text; image-only demo pages visually reviewed. Original name contains the Spain flag.
S5	WE SOLVE IT OUT LLC - Corporate Book V2.pdf	Extracted corporate clauses and closing text; original signatures not visually inspected.
S6	P&L - FeeForService_Proyeccion-7-2.xlsx	All-sheet structure/caches and representative material precedent chains; no recalculation.
S7	Welcome to Weso Insurtech - Pitch Deck!-3.pdf	Full extracted text; distinct source from S3.

Shared folder: [data room - Weso 2.0](#). Seven files listed before this review's additions on 7 September 2026. Downloaded originals were retained unchanged.

Uploaded correspondence

Three .webarchive uploads contain overlapping email excerpts. The first two have identical extracted text; the third is a subset. They support management's explanation of stepwise carrier activations, geographic opportunities and fundraising/warrant discussions, but are not three independent confirmations or evidence of completed transactions.

Recommended closure sequence

1. Finance and legal: produce the revenue bridge, bank-supported capitalization and governing SAFE/warrant/corporate pack. **2. Commercial and technology:** verify one live service cohort, contract scope and sandbox event contract. **3. Pilot and review:** measure accepted-case cost, response/resolution time, exceptions and human effort on an agreed population. **4. Approved reporting:** publish one dated fact sheet after human review of the same evidence version.

The companion Ironman workbook includes all 18 platform roles and all 24 local profiles, with evidence requirements, outputs and implementation gaps. Those inventories overlap functionally and should not be presented as 42 independently deployed agents. Current live-state metadata lists 5 active and 13 inactive platform agents; state alone does not prove successful execution.

Source completeness is bounded to the listed files and supplied excerpts. No standalone executed warrant, bank-receipt package or WESO source repository was found among these materials. These may exist elsewhere and should be requested through the appropriate owner.
